

Operations first. The products come out of the shop floor.

I set out to build a product and found the real problem was the factory behind it: how one person builds, tests, ships and adapts software without a development team.

So I built the shop floor first: the guardrails that keep it safe, the governance that keeps it honest, and the process flexibility that lets a business person run real software projects at near-zero cost. AI agents do the building. I set the direction, make the decisions and check the work.

Five tools and learning sites are publicly viewable. Every product below carries an Alpha tag. Proposed offers and extensions are identified within their blocks.

THE HAL STACK

7,077

commits across 15 repositories,
counted 8 October 2026

Guardrails

Automated checks block unsafe or unverified changes before they ship.

Governance

Written rules and recorded decisions for significant choices.

Public-address testing

Products are checked on their public addresses before a sprint counts as done. [Read the evidence](#) ↗

Potential ratings are Aaron's own judgement, not market proof.

Alpha

A free digital-skills learning site for adults and seniors

[Digital Confidence Centre]

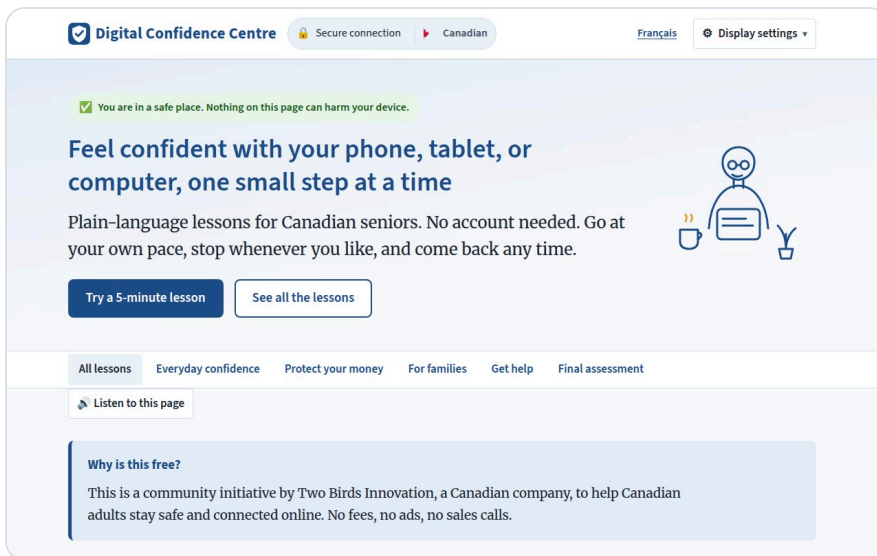

Plain-language Canadian lessons for safer, more confident technology use.

- Learn at your own pace, with no account needed.
- Practise spotting scams and using online banking safely.
- Build confidence with passwords, video calls and AI literacy.

Potential: worth testing with adults, seniors and community learning partners.

* Open backlog items: about 113 (rough count, shared adults + youth theme).

[Explore the lessons ↗](#)

The public adult learning page.

Alpha

Free digital-confidence learning for kids and teens

[Digital Confidence Centre, youth]

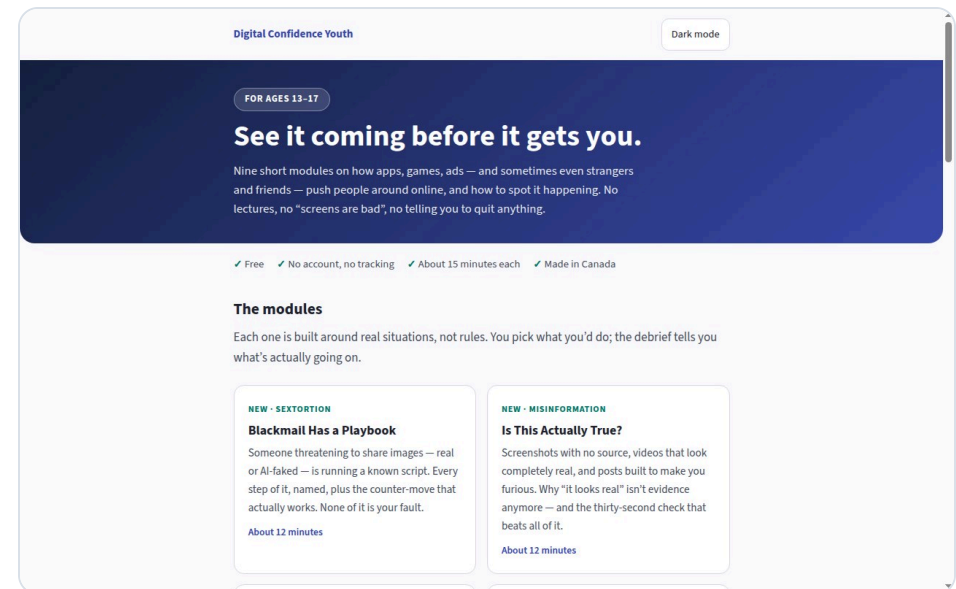

Age-appropriate learning about online safety and critical thinking.

- Nine short modules for ages 13 to 17 cover feeds, games, online pressure, misinformation and AI.
- Teen and parent courses include certificate checks.
- Younger kids have caregiver-led activities on privacy, kindness and critical thinking.

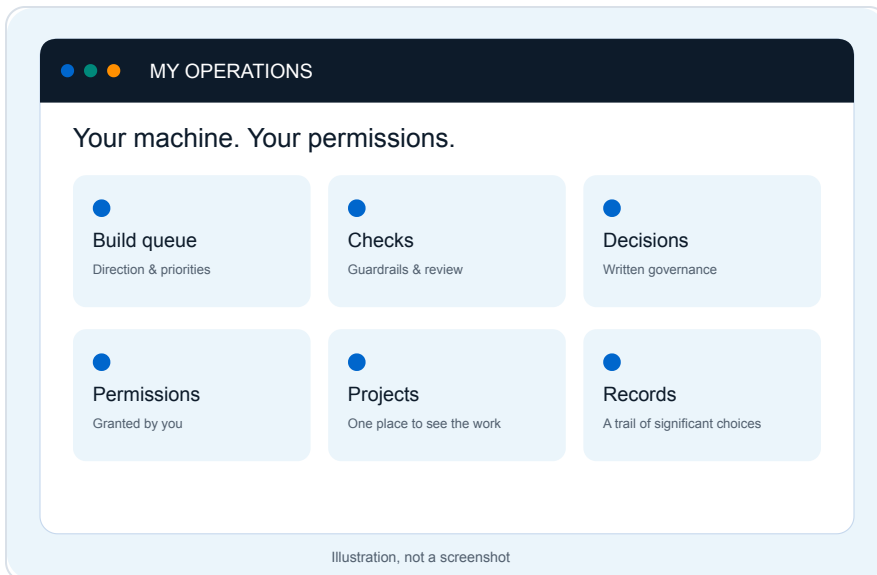

Potential: worth testing with families and community learning partners.

* Open backlog items: about 113 (rough count, shared adults + youth theme).

[Explore the teen modules ↗](#) [Explore the kids' activities ↗](#)

The public youth entry page.

Alpha

An AI operating system for solopreneurs

[the HAL Stack]

The shop floor works internally; its evidence page is public.

Status: concept, not yet built

- A productized offer would be a customized, sovereign, local image for each person.
- Run your own operations on your own machine.
- Like a personal assistant, it would receive only the permissions you are comfortable granting.

Potential: moderate to high; test the fit before a product build.

* Open backlog items: about 61 (rough count).

Alpha

A guided toolkit for starting your own fractional, consulting or side-gig business

[working name: none yet]

A Wix-style guided builder for new independent businesses in Southwestern Ontario. Say what you want to build: a consultancy, store, product or fractional role, plus your reach and goals.

Status: concept, not yet built

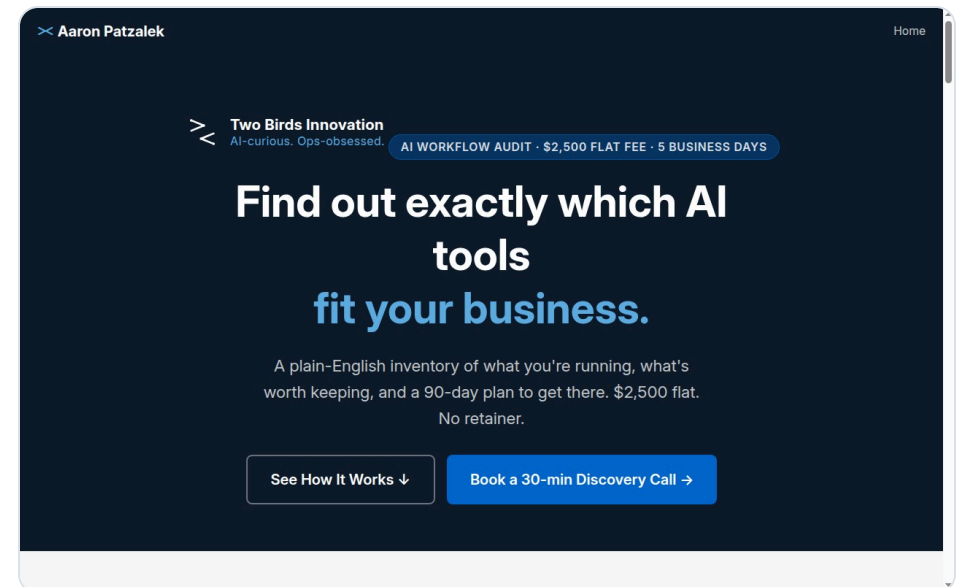

- **Direction:** a business plan and a practical roadmap.
- **Structure:** sole proprietorship, corporation or partnership, with plain-language risks and rewards.
- **Registration:** registering the business and sales tax (HST) basics, pointing to official sources.
- **Checkpoints:** insurance, legal considerations and certifications to consider, with official sources and professional advice where needed.
- **Practical setup:** calendar and booking, business email, a simple website, and an offer and price page.
- **AI help at each step:** using the person's own AI models.

For: New fractional and side-gig workers, students starting a business, and municipal and community economic-development teams offering a tool to local entrepreneurs.

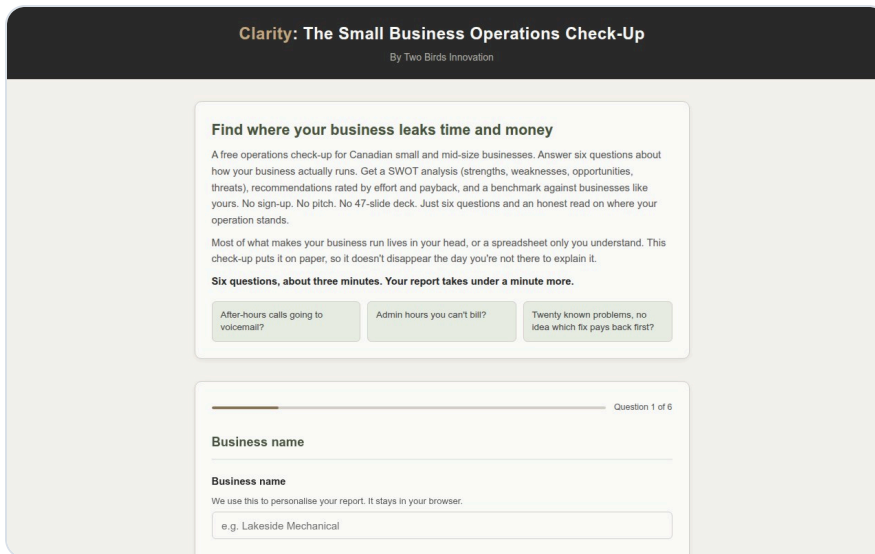

Potential: promising to test locally; the guided product remains a concept.

* Open backlog items: about 48 (rough count, Consulting/site).

First working example: Aaron's own practice, an operations audit with a \$2,500 flat fee and discovery-call booking.

Clarity: The Small Business Operations Check-Up
By Two Birds Innovation

Find where your business leaks time and money

A free operations check-up for Canadian small and mid-size businesses. Answer six questions about how your business actually runs. Get a SWOT analysis (strengths, weaknesses, opportunities, threats), recommendations rated by effort and payback, and a benchmark against businesses like yours. No sign-up. No pitch. No 47-slide deck. Just six questions and an honest read on where your operation stands.

Most of what makes your business run lives in your head, or a spreadsheet only you understand. This check-up puts it on paper, so it doesn't disappear the day you're not there to explain it.

Six questions, about three minutes. Your report takes under a minute more.

After-hours calls going to voicemail? Admin hours you can't bill? Twenty known problems, no idea which fix pays back first?

Question 1 of 6

Business name

We use this to personalise your report. It stays in your browser.

e.g. Lakeside Mechanical

The public operations check-up.

Alpha

A small-business operations check-up

[Clarity]

Six questions about how your Canadian business runs. No sign-up.

- Get strengths, weaknesses, opportunities and threats.
- Review recommendations rated by effort and payback.
- See quick wins and an industry benchmark.

Potential: worth testing as a practical first step for small-business operators.

* Open backlog items: about 40 (rough count).

[Try the check-up ↗](#)

Alpha

Career coach with automated job search

[Career Coach]

The alpha tool compares a CV with a real job posting and shows where to focus.

- Saved data stays in the browser; analysis sends selected content to your chosen AI provider.
- Roadmap idea, not started: a more capable AI agent for job search and discovery.
- Roadmap idea, not started: a more detailed intake questionnaire personalized to where the person is today.

Possible video-resume extension

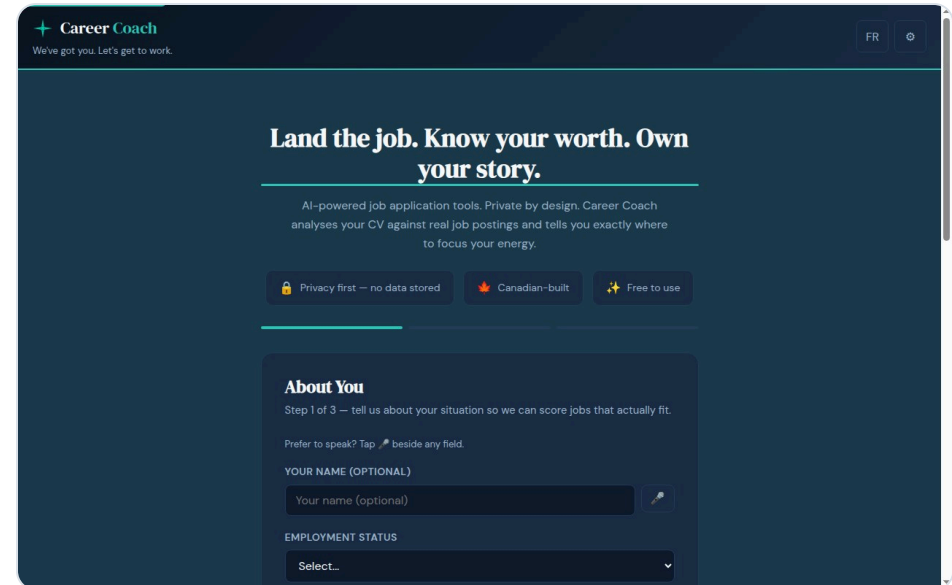

Status: concept, not yet built

A video resume could be explored later.

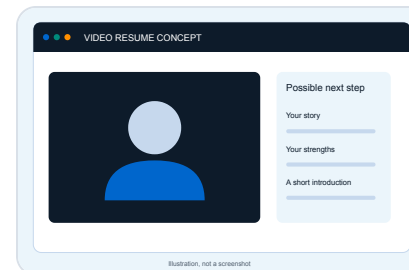

Potential: worth testing the current comparison tool before extending the job-search workflow.

* Open backlog items: about 61 (rough count, combined career theme).

Alpha

A business benchmark and roadmap report

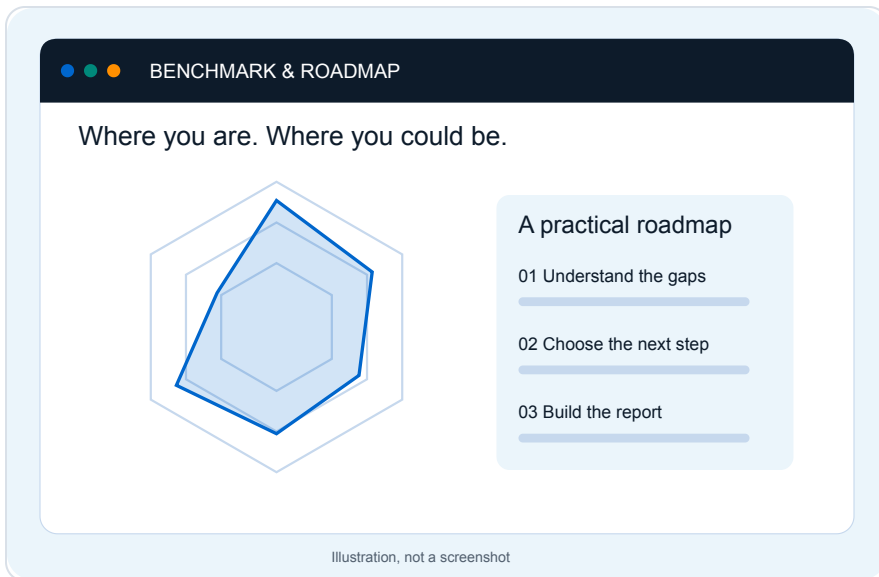

[NormeScore]

Work mostly built internally; the report is not yet public as a product.

- Businesses, especially regulated professionals, measure where they are and where they could be.
- Receive a customized white-paper-style report on gaps and a roadmap.
- The report can be white-labelled as a funnel for other businesses in any vertical.

Potential: worth testing a focused first release.

* Open backlog items: work mostly built; keyword count not meaningful.

An abstract benchmark report and roadmap. Illustration, not a screenshot.

Alpha

An idea-capture system

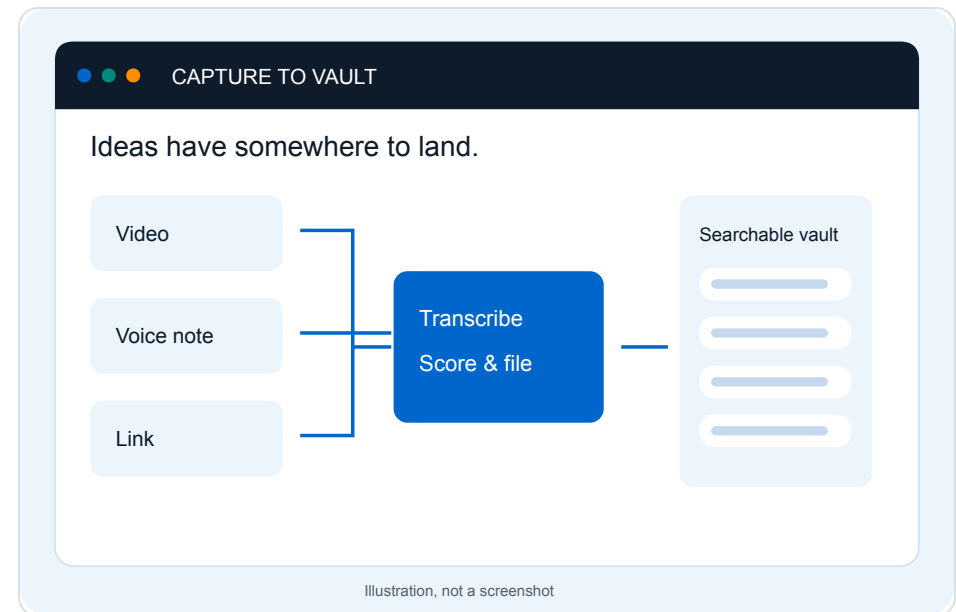

[Magpie Scribe]

An internal tool for turning scattered inputs into a searchable vault.

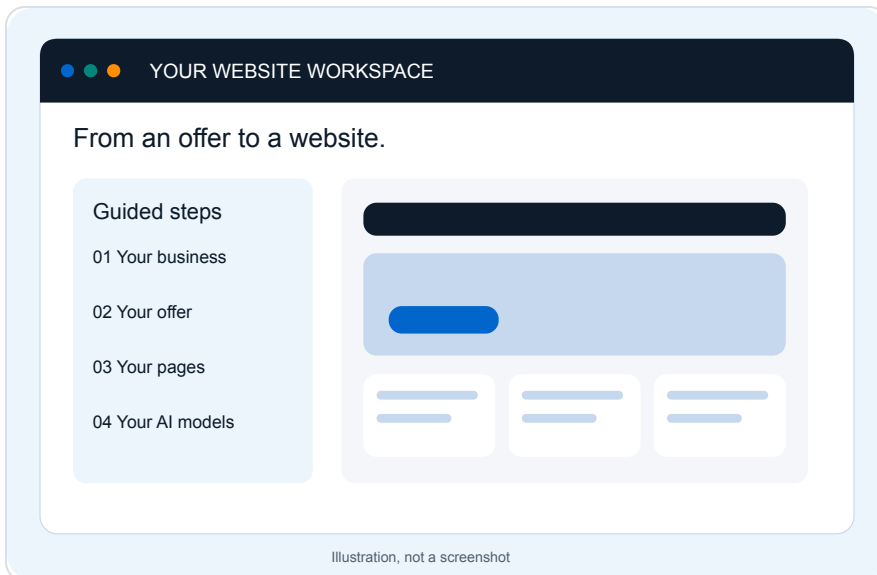

- Forward a video, voice note or link.
- Transcribe, score and file captured material.
- Includes the local transcription workflow [The Perch].

Potential: moderate. It needs to hold up for someone else before becoming a product.

* Open backlog items: about 8 (rough count, shared capture theme).

The flow from captured material to a searchable vault. Illustration, not a screenshot.

A proposed guided website workspace. Illustration, not a screenshot.

Alpha

An AI-guided website builder framework

[working name: none yet]

A framework for independent businesses to build and run their own website.

Status: concept, not yet built

- Use your own AI models.
- Guide website building around the needs of an independent business.
- The idea grew out of building small-business sites with the operating system.

Potential: useful to test alongside the guided business toolkit.

* Open backlog items: no dedicated items yet.

Alpha

A ranked apartment-search shortlist

[KevsCasa]

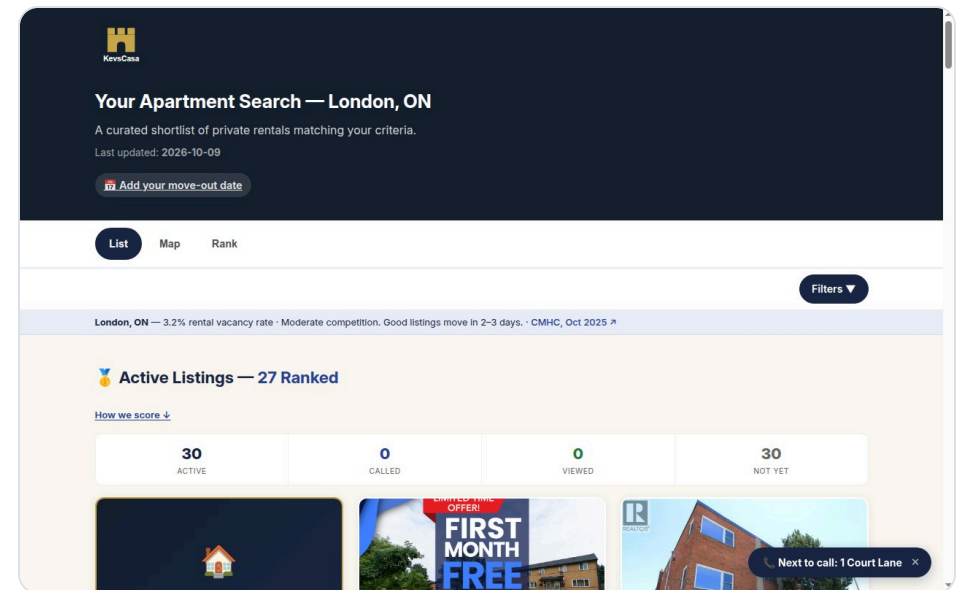

Curated private rentals for renters in London, Ontario.

- Compare rentals with list, map and ranking views.
- See a plain explanation of scoring and search criteria.
- Use call tracking; availability needs checking directly with landlords.

Potential: worth testing as a practical way to organize a local rental search.

* Open backlog items: about 18 (rough count).
